PROJECTS

Bugsnack - React, Express.js, MongoDB, bcrypt, Passport

- Designed an intuitive user interface that facilitates efficient creation, editing, and monitoring of bug reports. This feature enhances project transparency and team collaboration by providing a centralized platform for issue management.
- Engineered a robust user authentication system employing bcrypt and Passport, ensuring secure registration, login, and session management. This focus on security guarantees user data protection and controlled access to the app's functionalities.
- Leveraged MongoDB and Mongoose to architect well-optimized database schemas. The schemas accommodate the storage and retrieval of bug reports and user profiles, resulting in seamless data flow and streamlined operations.
- Implemented custom API endpoints to handle CRUD operations for bugs and user data. This modular approach simplifies data manipulation and ensures scalability for potential future enhancements.

ClipLink - Javascript, Chrome Extension APIs

- Concieved and developed an innovative tool that simplifies text transformation and clipboard management across various devices. addressing a common user need.
- Integrated seamlessly into the Chrome browser, providing users with an intuitive and accessible clipboard solution without the need for external applications.

EDUCATION

Istanbul University   **Istanbul**
Computer Programming

CERTIFICATIONS, SKILLS & INTERESTS

- **Certifications:** Harvard CS50;
- **Skills:** React.js;Javascript w/Typescript ; HTML;CSS w/SASS; RestAPIs; Git; NodeJS; Problem-solving;
- **Interests :**Running; Calisthenics; Cooking; Watching-Video-Essays; Fingerstyle Guitar
